Assignment of talks

#	Date	Topic	Speaker
1	24.09.	Riemann surfaces and Hurwitz numbers	Roland H.
2	01.10.	Intersection theory	Rivaldo C. M.
3	08.10.	Intersection theory on the moduli space of curves	
4	15.10.	Moduli space of genus zero stable maps	
5	22.10.	Moduli space of higher genus stable maps	
6	29.10.	Equivariant intersection theory and localisation	
7	05.11.	Localisation for stable maps to projective space	
8	12.11.	The ELSV formula and relative stable maps	
9	19.11.	Hurwitz numbers, Hodge integrals and Fock space	
10	26.11.	The stationary Gromov-Witten theory of $\mathbb{P}^1$	
11	03.12.	The Gromov-Witten/Hurwitz correspondence	
12	10.12.		
13	17.12.		

Assignment of talks

Please tell me your preferences until tomorrow evening:

<https://forms.gle/3qoqnFV6qEUCR5BN7> 

Results announced Tuesday next week!

Formalities: requirements to pass

In order to pass the seminar, you have to:

- **give a talk** from the list to the other participants
- **attend** (most of) the talks of the other participants

Presentations: Road map

Presentations

- $\boxed{\text{Talk}} = \boxed{\text{Introduction/Review}} + \boxed{\text{Main Part}} + \boxed{\text{Summary/Outlook}}$
- Focus on key ideas rather than small details
- State your main results early
- Small lies are okay (if you are honest about them)
- Add illustrating examples, sketches,...
- Time management $\rightarrow$ practise beforehand
- Notation $\rightarrow$ try to be consistent with earlier talks
- Encourage questions and interaction

Notes?

- Question: $\exists$ 1–2 volunteers for turning seminar talks into notes?
→ online form
- when? → next semester
- reading course → credits + grade
- aided by AI
- Question: all participants willing to share notes/record talks?
→ online form

I am looking forward to
an exciting seminar with you!
